

The GC210 is a business card slitter that will quickly and professionally produce business cards with a bleed edge design. 8 1/2" x 11" sheets can easily be converted into finished 2" x 3 1/2" business cards with a simple two pass operation. It fits securely on a custom waste bin for ease-of-use, maximizing run time, and no-mess production. The cutting blades are hardened steel and are self sharpening for years of operation without sharpening or replacement. Stacks up to 5/8" thick can be ran continuously allowing operation of up to 360 completed cards per minute. For maximum safety, the machine will not run if the rear cover is not in place and has an interlock switch for added safety. The rear cover strips waste away from rollers making it self-cleaning.

- Cutting blades are hardened steel and self sharpening for years of operation without sharpening or replacement
- Rear cover panel strips waste away from rollers - self cleaning
- For maximum safety the machine will not run if rear cover is not in place
