The Professional Dictation You Need— On the Go

DS-9500 The New Standard in Digital Recorders

Record your voice and manage dictation workflow in any environment.

The new DS-9500 digital recorder features WiFi technology, a superior noise canceling system, and improved structural integrity to simplify your workflow and improve your dictation efficiency.

Developed for professionals who require the best dictation no matter the environment. Intelligent dual microphones control the directionality to keep the focus on the person dictating and suppress ambient noise in offices, hospitals, cars, airports, and other noisy environments. The DS-9500 is designed to be a strong and dependable workhorse in heavy-use environments. Complete with 256-bit AES encryption and device PIN lock, the DS-9500 provides trusted security for your most sensitive information.

DS-9500 Features

WiFi Compatible

Managing workflow and sending dictation via WiFi accessibility provides increased flexibility and improved efficiency. Pairing with your personal hotspot or office network provides real-time file sharing with your transcriptionist. Status of transcription files can easily be checked on the DS-9500.

Intelligent Dual Microphones

Enjoy crystal clear voice in any environment. The intelligent dual microphone technology ensures optimization for many different recording environments. For example, in a noisy environment such as an airport, use narrow directionality to ensure that voice is accurately captured. For conference rooms when multiple individuals are speaking, use a wide directionality recording setting to accurately capture all presenters.

Professional Quality Studio Recording

An included studio-quality pop filter reduces additional noise from wind and breath noise, enabling more accurate transcription and professional, high-quality recordings.

Shockproof Body

A reliable body design resistant up to a 1.5-meter (4.9-foot) fall dramatically enhances the lifespan of the DS-9500 in heavy-use environments. An optical slide switch reduces the risk of mechanical failure.

The need to connect to a computer adds time and inefficiency to your day. With the DS-9500, your files can flow into your WiFi network and you can dictate wherever you are. Just grab the device and start dictating.
